

BENTU PSC

RIAU PROVINCE

Working Interest: **100%**

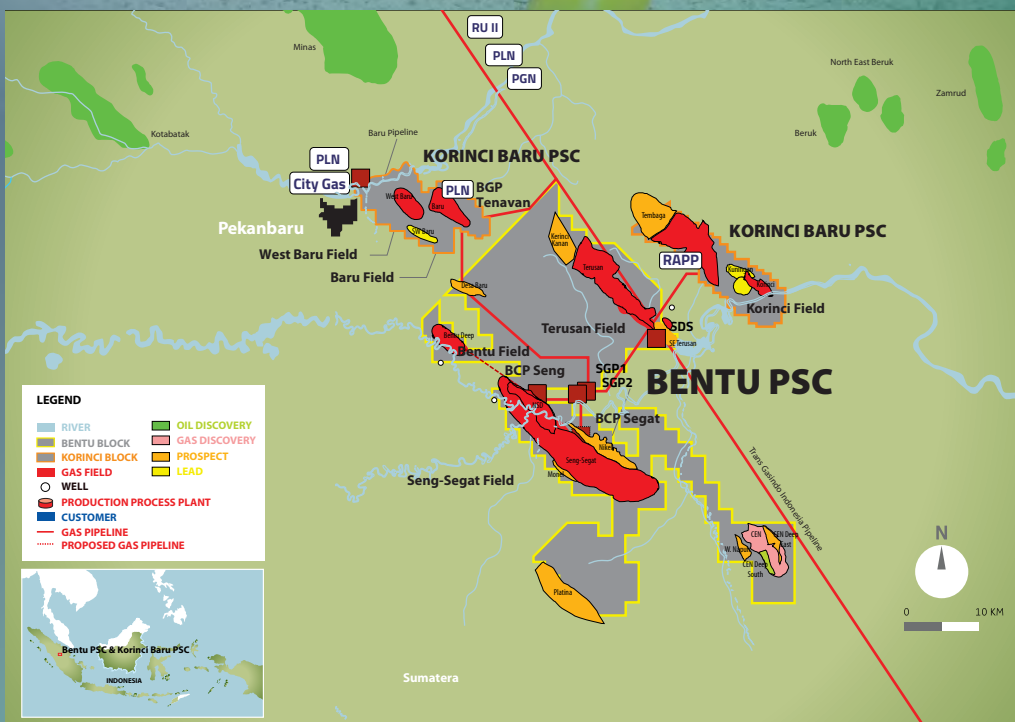

Area: **1,039.02 km²**

Operator: **EMP Bentu Limited**

Bentu PSC is an onshore gas project located in Riau province, Indonesia covering a working area of 1,039.02 km². The block is 100% operated by EMP Bentu Limited and plays a strategic role in Riau province gas supply, supporting the industry and power generation sector. The gas produced from Bentu PSC is supplied to major buyers, including PLN (Perusahaan Listrik Negara), PT Kilang Pertamina Internasional (KPI), PT Riau Andalan Pulp & Paper (RAPP), and PT Perusahaan Gas Negara Tbk (PGN), ensuring a stable energy supply for various industries.

The long-term development plan for Bentu PSC includes continuous drilling campaigns in the Seng-Segat Field, the reactivation of wells, and the construction of new production lines to maximize production. The project also includes the Booster Compression Plant at Seng & Segat, ensuring enhanced production efficiency. Exploration efforts are underway, including the drilling of N.Napuh-01 and CEN-01 wells in the Central East Napuh (CEN) Field.

Looking ahead, Bentu PSC aims to further develop the OPLL Seng-Segat-Terusan-CEN, with the CEN and Terusan Field expected to come onstream soon. Additional exploration activities in Lead & Prospect areas, including seismic acquisition and new drillings, will support future growth.

With a strong commitment to sustainable gas production and infrastructure expansion, Bentu PSC continues to enhance the region's energy supply while ensuring long-term resource optimization and operational efficiency
