

SOUTH CPP PSC

RIAU PROVINCE

Working Interest: 100%

Area: 5,447.14 km²

Operator: EMP Tunas Energi

South CPP Block covering an area of 5,447.14 km², the working area spans across Kota Pekanbaru, Pelalawan, Kuantan Singingi, Kampar, and Indragiri Hulu regency, Riau Province. The block is owned and operated by PT EMP Tunas Energi (100%) under a Cost Recovery scheme. The current contract period runs from 2021 to 2051, ensuring a long-term development for the block. Strategically positioned in a prolific region with a history of oil and gas discoveries, the block presents promising opportunities for future exploration. Through geological and geophysical studies, several high-potential areas have been identified for further exploration and development.

As part of the South CPP PSC exploration plan, efforts are focused on exploration and development activities within the block. These initiatives include seismic analysis, 2D seismic acquisition, and exploration drilling. Exploration activities will be carried out to enhance the potential for new discoveries and unlock future production.

Comprehensive project analysis is being conducted to optimize exploration and development activities within the South CPP Block. This includes assessing economic feasibility, technological requirements, and environmental considerations to ensure sustainable and efficient operations. By leveraging advanced exploration techniques and strategic planning, the South CPP Block aims to contribute to the long-term growth and success of the region's energy sector.
