

GEBANG PSC

NORTH SUMATRA PROVINCE

Working Interest: **100%**

Area: **879.61 km²**

Operator: **EMP Gebang Limited**

Gebang PSC is an oil and gas block in North Sumatra, Indonesia, located in both onshore and offshore area, with working area of 879.61 km². The block is 100% operated by EMP Gebang Limited under a Production Sharing Contract (PSC), valid for 20 years from 2015 to 2035.

The asset consists of two main fields, Secanggang and Anggor field, with ongoing efforts to optimize production and resource management. The Secanggang Field, a near-commercial asset, has undergone multiple assessments to determine its potential, with the Plan of Development (POD) approved in 2021.

The commercialization strategy for Gebang PSC focuses on monetizing gas production through sales agreements and infrastructure enhancements to maximize field potential. Currently, EMP is in negotiation with PT Pupuk Iskandar Muda (PIM) and additionally, PLN has expressed interest in offtaking the gas to meet power plant demand in Belawan, further strengthening the market potential for Gebang PSC's gas production.
