

KAMPAR PSC

RIAU PROVINCE

Working Interest: 90%

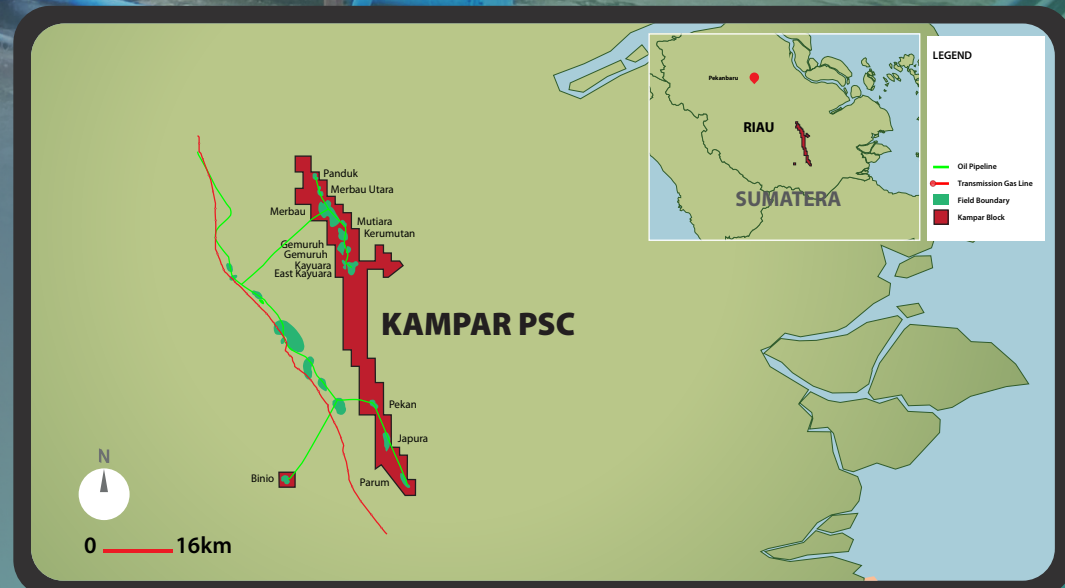

Area: 421.91 km²

Operator: PT EMP Energi Riau

Partner: PT Riau Petroleum Kampar (10%)

The **Kampar PSC**, covering an area of 421.91 km², is 90% owned by PT EMP Energi Riau and 10% by PT Riau Petroleum Kampar (Local Government Owned Company), is currently operated by PT EMP Energi Riau and operates under a Cost Recovery scheme. The contract period runs from 2016 to 2035, ensuring a long-term development for the block. The block's production operations are centered around Merbau, Sei Karas, and Kayu Ara fields, with crude oil transported primarily by truck to PEP Lirik Terminal Buatan as the lifting point.

To sustain and increase production, several initiatives have been planned for the coming years. In 2025, the operator will undertake development wells drilling, workover activities, and well service operations. Additional exploration and seismic reprocessing studies are also being conducted to support future drilling programs. These efforts aim to optimize recovery and extend the block's production

life.

Furthermore, to improve operational efficiency, the operation of Kampar PSC is implementing cost optimization measures, including the conversion of diesel power plants (PLTD) to gas-fired power plants (PLTG) and the purchase of electricity from PLN to reduce energy costs and CO₂ emission. These efforts ensure sustainable operations while maintaining profitability. Through continuous investment in exploration, drilling, and infrastructure improvements, PT EMP Energi Riau aims to enhance the block's productivity.
