

MALACCA STRAIT PSC

RIAU PROVINCE

Working Interest: **100%**

Area: **7,031.30 km²**

Operator: **PT Imbang Tata Alam**

Malacca Strait PSC, operated by PT Imbang Tata Alam under a Production Sharing Contract (PSC), is fully owned (100%) by PT Energi Mega Persada Tbk (“EMP”). The PSC covers an area of 7031.30 km², consists of 58% offshore area with water depth of approximately 30 meters and 42% onshore area in Riau Province, Indonesia. The working area includes Siak, Kepulauan Meranti and Bengkalis regency. The contract follows a Gross Split scheme and is valid from 2020 until 2040. The production from Malacca Strait PSC is supplied to Kilang Pertamina International, PLN, and TIS Petroleum, supporting both domestic and international energy needs.

To sustain production and maximize reserve potential, the Malacca Strait PSC has outlined a series of exploration and development activities over the coming years. In 2025, the focus will be on exploration through wildcat drilling and delineation drilling in several key areas, including MSAC N, MSTB NW, MSCN, and MSH, alongside the development of the Ringgit Field. Additional projects in subsequent years include exploration in MSP, West Kurau, and further development in TB & Melibur field. These initiatives aim to expand the field’s reserves and enhance production efficiency, ensuring a stable supply to buyers.

By 2028, the Malacca Strait PSC development & facilities project from exploration success are expected to come onstream, further supporting the region’s production capabilities. Continuous exploration efforts will also be carried out in various fields to identify new hydrocarbon potential and sustain long-term operations. Through this strategy, the Malacca Strait PSC is committed to maintaining and enhancing production while optimizing the remaining reserves throughout the contract period.
