

SIAK PSC

RIAU PROVINCE

Working Interest: 90%

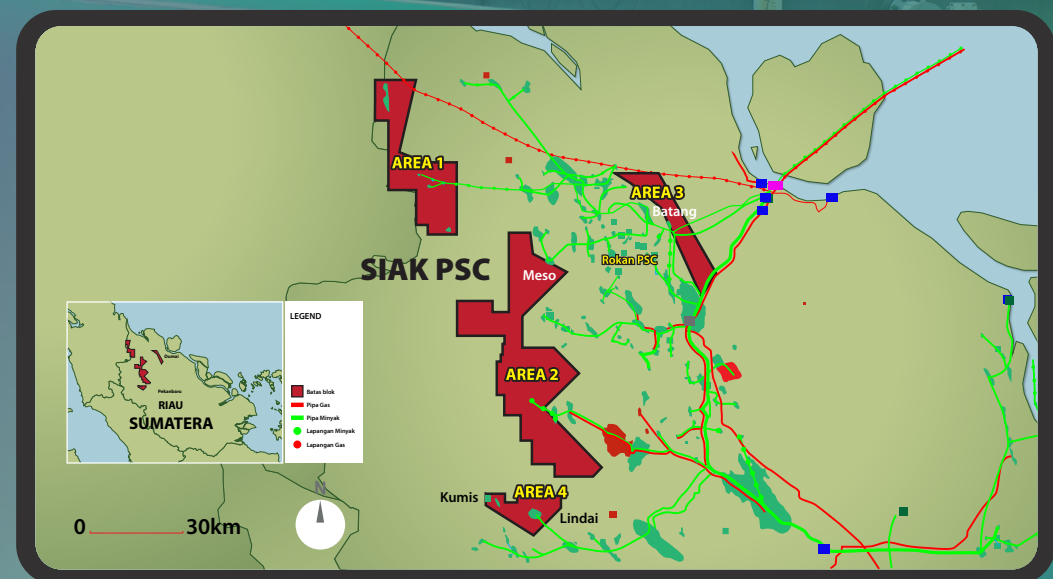

Area: 2,287.17 km²

Operator: PT EMP Energi Gandewa

Partner: PT Riau Petroleum Siak (BUMD) 10%

Siak PSC is an oil and gas working area located in Siak Regency, Riau Province, Indonesia, covering a total area of 2,287.17 km². The block operates under a Cost Recovery scheme and is 90% owned by PT EMP Energi Gandewa and 10% by PT Riau Petroleum Siak (Local Government Owned Company). The contract period runs from 2014 to 2034. Strategically positioned adjacent to the the Rokan PSC, Siak PSC consists of multiple key areas, including Area 1, Area 2, Area 3, and Area 4, which have been identified as prospective zones for hydrocarbon accumulation. The presence of fields such as Batang, Lindai, and Meso further highlight the block's importance in supporting regional energy production.

As part of its operation strategy, Siak PSC continues to focus on maximizing production efficiency while identifying new opportunities for reserve growth. Advanced geological and geophysical, reservoir studies are being conducted to enhance field development planning, with seismic reprocessing, workover & well service activities, and drilling programs playing a crucial role in maximizing reservoir potential. These initiatives align with the broader objective of ensuring long-term sustainability and profitability in the block's operations.

Moving forward, Siak PSC remains committed to implementing exploration and production strategies that optimize recovery while maintaining environmental and operational efficiency. The block's crude oil offtaker is PT Kilang Pertamina Internasional, ensuring a steady buyer for its production. With continued investment in infrastructure and field development, Siak PSC aims to enhance its contribution within the region's upstream oil and gas industry.
