

SENGKANG PSC

SOUTH SULAWESI PROVINCE

-  Working Interest: **100%**
-  Area: **2,925.23 km²**
-  Operator: **Energy Equity Epic Sengkang**

Nestled in the heart of South Sulawesi, **Sengkang PSC** working area spans over 2,925.23 km² in Wajo Regency, with a Production Sharing Contract (PSC) period valid until 2042. The block is operated by Energy Equity Epic (Sengkang) Pty. Ltd. (EEES), holding a 51% interest, with PT Energi Maju Abadi controlling the remaining 49%. Its primary producing asset is the Kampung Baru Field, and the gas is processed at the Kampung Baru Processing Facilities, where amine and dehydration systems convert sour gas into market-ready sweet dry gas.

Supporting this production is an extensive infrastructure network, including gas export pipelines, processing plants, and metering stations, ensuring seamless delivery to key buyers. PT PLN NP, Indonesia's state-owned company, receives up to 50 BBtud for electricity generation, while PT PGN Tbk supplies city gas to approximately 17,000 households. The upcoming Gas Booster Compression Plant (BCP), set to commence operations in Q3 2025, will further enhance production efficiency.

With an ambitious 2025 Work Program & Budget (WP&B) targeting up to 50 MMscfd of gas, the Sengkang Block is poised for steady growth. Every aspect of gas production and distribution are meticulously managed. As the industry evolves, Sengkang Block PSC remains steadfast in its mission to fuel the region's energy demand.
