

TONGA PSC

NORTH SUMATRA PROVINCE

Working Interest: 94.29%

Area: 521.44 km²

Operator: PT EMP Tonga

Partners: PT Petross EP (5.71%)

Tonga PSC is an onshore oil asset located in Padang Lawas, North Sumatra, Indonesia, covering a working area of 521.44 km². The block is 100% operated by PT EMP Tonga under a Production Sharing Contract (PSC) valid until 2037. Currently, the block has undergone production reactivation and successfully came back on-stream in October 2024. Crude oil from the field is transported via trucking from Tonga to GS Lindai, before being delivered through the CPI Petapahan-Dumai pipeline to Dumai Sale Point.

Following EMP's acquisition of the Siak Block in 2024, crude oil delivery from Tonga Field was rerouted to GS Lindai, significantly reducing transportation distance from 420 km to 203 km. This operational shift has improved logistical efficiency and streamlined crude handling. The first trucking delivery to GS Lindai marked an important milestone in Tonga PSC's ongoing development.
